

Don't gamble with code quality

If you build them...
will they run?

Test your GUIs
and know for sure.

GUIs

New WindowTester™ Pro from Instantiations offers **automated GUI testing for Java applications.**

Now developers can identify and correct defects in GUIs while they write code, reducing costs by orders of magnitude. And WindowTester Pro frees developers to spend more time on business logic by automating testing.

WindowTester Pro fosters systematic reuse of GUI tests,

enabling organizations to realize value over the life of their applications.

- ❖ Click and Record
- ❖ Automatic Playback
- ❖ Continuous Test through build integration
- ❖ Code Coverage analysis
- ❖ Rich GUI Test Library
- ❖ Supports both Swing and SWT

introducing **WindowTester™ Pro**
the perfect companion to the award-winning
WindowBuilder™ Pro

If you **want** to play the odds, come to the Instantiations booth and **Spin to Win** an iPod, software, or other prizes!
